The IMC Global Small Cap strategy gained 5.27% (net of fees) in the fourth quarter of 2025, outperforming the MSCI ACWI Small Cap Index benchmark by 261 basis points. For the year, the strategy finished up 21.51%, 179 basis points ahead of its benchmark. Contributions from Informed Momentum (momentum + stock selection) drove outperformance in the quarter and year.

MARKET ENVIRONMENT

A positive quarter for global equities, capping off a strong 2025

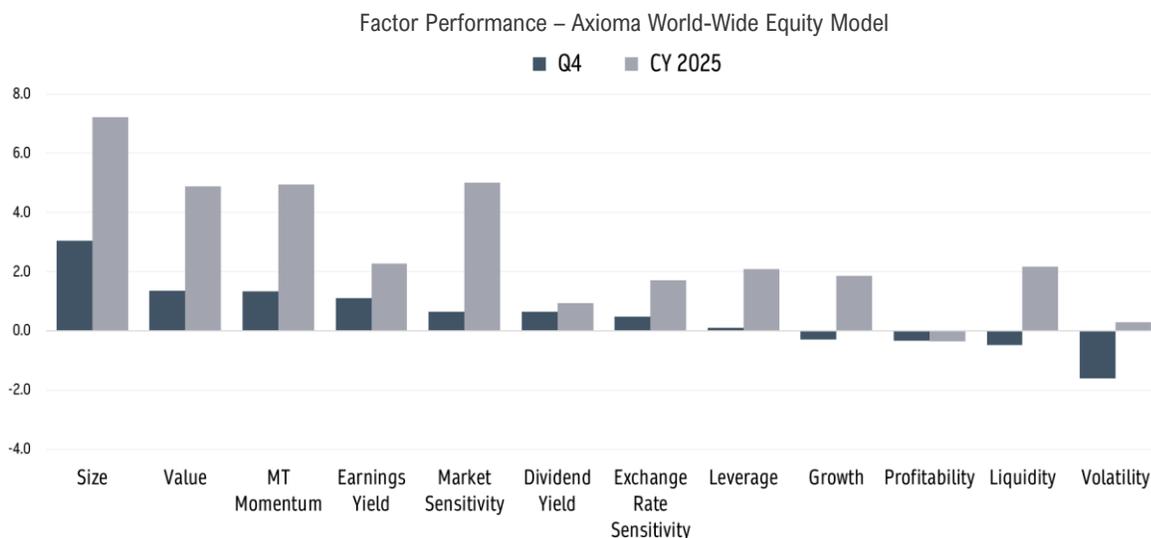

- For the first time in several years, **non-US equities significantly outperformed US** equities for the calendar year. Returns were supported by easing inflation, more accommodative central bank policy, and improving earnings momentum across Europe and parts of Asia.
- The **AI investment cycle remained a key structural tailwind** for equity markets globally, continuing to benefit both technology and AI-adjacent sectors. Markets with heavy exposure to this theme did best in the quarter, including Korea, Israel, and Taiwan. At the same time, there were signs of market leadership broadening, particularly in more cyclically exposed areas where cheaper valuations and improving fundamentals attracted investor interest. Consequently, the **outperformance of value over growth** was a prominent theme in Q4.
- The MSCI ACWI Small Cap Index finished the quarter up 2.66% to end the year up 29.26%. This was just shy of MSCI ACWI, which gained 3.29% in the quarter and 22.34% in 2025. Israel and Canada were notable outperformers in small cap in the quarter, while heavy-weight tech companies continued to give large cap its edge.

Size, Value, and Momentum led in Q4

According to Axioma, size, value, and momentum were the best-performing factors in global equity markets in Q4, while volatility was the standout detractor. For the year, size was also the best performer, followed by market sensitivity (beta), momentum, and value.

Looking at stocks within the MSCI ACWI Small Cap Index, stocks with low quality characteristics led. Non-earners were the best performing segment, up 5.5% in Q4, followed by stocks with low ROE, low-to-negative earnings growth, and high beta. Higher momentum stocks also outperformed, with the top quintile gaining 4.4% in the quarter.

Israel and Canada led gains, while China slid

Within the MSCI ACWI Small Cap Index, Israel was among the top performing countries in Q4, rising 19.0% on continued strength in technology and AI-adjacent areas. Taiwan and Korea also benefited from technology tailwinds, while Canada posted double-digit gains driven by rising metals and commodity prices. On the other side, after being the best-performing market last quarter, China sold off 12.8% in Q4 amid muted domestic demand and persistent property sector weakness.

At a sector level, health care and materials were the best performers in Q4, while consumer-oriented sectors were the laggards.

Q4 2025 ATTRIBUTION

Informed Momentum contributed most in Q4

The IMC Global Small Cap strategy gained 5.27% (net of fees) in the fourth quarter of 2025, outperforming the MSCI ACWI Small Cap Index by 261 basis points.

- Risk attribution shows Informed Momentum (momentum + stock selection) was most additive, while the strategy further benefited from relative industry positioning and exposure to size. This was partially offset by negative effects from exposure to volatility and underexposure to value.
- Performance attribution shows positive stock selection drove outperformance in the quarter, particularly in Taiwan and the US. Allocation effects from being overweight to Taiwan and Canada were further additive.
- Stock selection in Korea and China detracted in the quarter.

CALENDAR YEAR 2025 ATTRIBUTION

Informed Momentum drove outperformance in 2025

The IMC Global Small Cap strategy gained 21.51% (net of fees) in calendar year 2025, outperforming the MSCI ACWI Small Cap Index by 179 basis points.

- Informed Momentum (momentum + stock selection) was most additive in the year, while relative industry exposures (overweight aerospace & defense, biotech) and exposure to growth also contributed to outperformance. Underexposure to value and exposure to market sensitivity detracted.
- Performance attribution shows the strategy benefited from positive stock selection, particularly in Taiwan, Spain, and Italy. This was partially offset by negative stock selection in Japan, India, and Hong Kong.
- Allocation effects were positive in the period driven by overweights to Korea and China.

All periods greater than one year are annualized. Please see the "Important Disclosures" page for detailed performance disclosures.

Inception-to-Date returns are for the period from July 1, 2017 for Global Small Cap, for the period from February 1, 2018 for Global Micro Cap, and for the period from January 1, 2024 for Global Equity.

¹Effective 2/4/2025, the EAM Global Opportunities strategy and EAM Global Discovery strategy changed their names to IMC Global Small Cap and IMC Global Micro Cap, respectively. This name change aligns with the firm's rebranding from EAM Investors to the Informed Momentum Company (IMC) and more accurately reflects the strategy's investment focus. Please note, the investment approach, objectives, and the team managing the strategy remain unchanged.

*Model strategies are paper-traded daily and maintained and calculated using the Factset Research System. The system calculates hypothetical performance based on end of day pricing. Transactions were not executed, and no actual investments were made within the model portfolio. The performance figures do not reflect the results of actual trading or the cost of taxes, brokerage, management fees or other expenses or taxes applicable to a typical investor. Model returns include an allocation to cash and the hypothetical receipt of dividends.

**Global Micro Cap benchmark is comprised of the Russell Global Micro Cap index from inception thru 12/31/2018, thereafter returns are for the FTSE Global Micro Cap Index.

Quarterly Commentary

Important Disclosures

Past performance does not ensure future results, and there is no assurance that the portfolios will achieve their investment objectives.

Gross and net composite returns are presented net of brokerage commissions and include income from interest and dividends as well as capital gains less applicable withholdings. The returns do not reflect the deduction of other taxes a typical investor may accrue or custodial fees. The U.S Dollar is the currency used to express performance. All periods greater than one year are annualized.

As of February 4th, 2025, EAM Investors, LLC, "EAM" has officially changed its name to the Informed Momentum Company, "IMC". This name change does not impact the integrity or content of the research, reports, or any materials previously published under the old name. All references to "EAM" in past publications and reports now refer to "IMC".

IMC US Small Cap

The inception date for the IMC US Small Cap composite is October 2, 2007. Net returns are net of the maximum annual management fee of 0.50%. The Russell 2000 Index consists of the smallest 2,000 securities in the Russell 3000 Index, representing approximately 10% of the Russell 3000 total market capitalization. The Russell 2000 Value Index (R2KVI) measures the performance of those Russell 2000 companies with relatively lower price-to-book ratios and lower forecasted growth values. The Russell 2000 Index and the Russell 2000 Value Index are being presented for informational purposes only. The Russell 2000 Growth Index (R2KGI) measures the performance of those Russell 2000 companies with higher price-to-book ratios and higher forecasted growth values. The Russell 2000 Growth Index has been chosen as a benchmark to the IMC US Small Cap Growth composite because the Advisor believes that it is the most appropriate broad-based securities index to be used for comparative purposes given the investment growth-oriented strategy of the portfolio.

IMC US Micro Cap

The inception date for the IMC US Micro Cap composite is October 2, 2007. Net returns are net of the maximum annual management fee of 0.50%. The Russell Microcap Index consists of the smallest 1,000 companies in the small-cap Russell 2000 Index plus the next 1,000 securities. The Russell Microcap Growth Index (RMGI) measures the performance of those Russell Microcap companies with higher price-to-book ratios and higher forecasted growth values. The Russell Microcap Value Index measures the performance of those Russell Microcap companies with lower price-to-book ratios and lower forecasted growth values. The Russell Microcap Growth Index and the Russell Microcap Value Index are being presented for informational purposes only. The Russell Microcap Index has been chosen as a benchmark to the IMC Micro Cap composite because the Advisor believes that it is the most appropriate broad-based securities index to be used for comparative purposes given the investment strategy of the portfolio. As of September 1, 2025, the benchmark for the US Micro Cap strategy has been changed from Russell MicroCap Growth Index to Russell MicroCap Index to better align with the strategy's investment objectives and market exposure. Historical performance data from the strategy's inception has been recalculated using Russell MicroCap for comparison purposes. Prior presentations of the strategy's performance, including those in pitchbooks distributed to prospective investors, utilized Russell MicroCap Growth as the benchmark. The change in benchmark may result in different relative performance outcomes.

IMC US Ultra Micro Cap

The inception date for the IMC US Ultra Micro Cap composite is October 2, 2007. Net returns are net of the maximum annual management fee of 0.50%. The Russell Microcap Index consists of the smallest 1,000 companies in the small-cap Russell 2000 Index plus the next 1,000 securities. The Russell Microcap Growth Index (RMGI) measures the performance of those Russell Microcap companies with higher price-to-book ratios and higher forecasted growth values. The Russell Microcap Value Index measures the performance of those Russell Microcap companies with lower price-to-book ratios and lower forecasted growth values. The Russell Microcap Growth Index and the Russell Microcap Value Index are being presented for informational purposes only. The Russell Microcap Index has been chosen as a benchmark to the IMC Ultra Micro Cap composite because the Advisor believes that it is the most appropriate broad-based securities index to be used for comparative purposes given the investment strategy of the portfolio. As of September 1, 2025, the benchmark for the US Ultra Micro Cap strategy has been changed from Russell MicroCap Growth Index to Russell MicroCap Index to better align with the strategy's investment objectives and market exposure. Historical performance data from the strategy's inception has been recalculated using Russell MicroCap for comparison purposes. Prior presentations of the strategy's performance, including those in pitchbooks distributed to prospective investors, utilized Russell MicroCap Growth as the benchmark. The change in benchmark may result in different relative performance outcomes.

IMC US Mid Cap

The inception date for the IMC US Mid Cap representative account is April 1, 2019. Net returns are net of the maximum annual management fee of 0.35%. The Russell Midcap Index is a subset of the Russell 1000 Index and is designed to measure the performance of the mid-cap segment of the US equity universe. It includes approximately 800 of the smallest securities based on a combination of their market cap and current index membership. The Russell Midcap Growth Index measures the performance of those Russell mid-cap companies with higher price-to-book ratios and higher I/B/E/S forecasted medium term (2 year) growth and higher sales per share historical growth (5 year). The Russell Midcap Value Index measures the performance of those Russell Midcap companies with lower price-to-book ratios, lower I/B/E/S forecast medium term (2 year) growth and lower sales per share historical growth (5 years). The Russell Midcap Index has been chosen as a benchmark to the IMC Mid Cap representative account because the Advisor believes that it is the most appropriate broad-based securities index to be used for comparative purposes given the investment strategy of the portfolio. As of July 1, 2025, the benchmark for the US Mid Cap strategy has been changed from Russell Midcap Growth Index to Russell Midcap Index to better align with the strategy's investment objectives and market exposure. Historical performance data from the strategy's inception on April 1, 2019, has been recalculated using Russell Midcap for comparison purposes. Prior presentations of the strategy's performance, including those in pitchbooks distributed to prospective investors, utilized Russell Midcap Growth as the benchmark. The change in benchmark may result in different relative performance outcomes. This strategy is currently funded by seed capital. Its performance may be impacted by a limited capital base, which can result in higher volatility and potential deviations from future performance as additional capital is deployed. The strategy's risk/return profile may evolve over time as it grows and the capital base increases.

Quarterly Commentary

IMC US Large Cap

The inception date for the IMC US Large Cap representative account is March 1, 2022. Net returns are net of the maximum annual management fee of 0.20%. The Russell 1000 Index measures the performance of the large cap segment of the US equity universe and is designed to represent approximately 1,000 of the largest securities based on a combination of their market cap and current index membership. The Russell 1000 Index has been chosen as a benchmark to the IMC US Large Cap portfolio because the Advisor believes that it is the most appropriate broad-based securities index to be used for comparative purposes given the investment strategy of the portfolio. The Russell 1000 Growth Index measures the performance of those Russell 1000 companies with higher price-to-book ratios and higher forecasted growth values. The Russell 1000 Value Index measures the performance of those Russell 1000 companies with lower price-to-book ratios and lower forecasted growth values. The Russell 1000 Growth Index and the Russell 1000 Value Index are being presented for informational purposes only. This strategy is currently funded by seed capital. Its performance may be impacted by a limited capital base, which can result in higher volatility and potential deviations from future performance as additional capital is deployed. The strategy's risk/return profile may evolve over time as it grows and the capital base increases.

IMC Non-US Small Cap

The inception date for the IMC Non-US Small Cap composite is May 1, 2011. Net returns are net of the maximum annual management fee of 0.50%. The MSCI ACWI ex-US Small Cap Index captures small cap representation across 22 of 23 Developed Markets (DM) countries (excluding the US) and 25 Emerging Markets (EM) countries. The index is designed to measure small cap equity market performance in the global developed and emerging markets excluding the United States. The MSCI ACWI ex-US Small Cap Index has been chosen as a benchmark to the IMC Non-US Small Cap strategy because the Advisor believes that it is the most appropriate broad-based securities index available to be used for comparative purposes given the investment strategy of the portfolios. The MSCI ACWI ex-US Small Cap Growth Index captures small cap securities exhibiting overall growth style characteristics across 22 of 23 DM countries (excluding the US) and 25 EM countries. The MSCI ACWI Small Cap Value Index captures small cap securities exhibiting overall value style characteristics across 23 DM countries and 25 EM countries. The MSCI ACWI ex-US Small Cap Growth Index and the MSCI ACWI ex-US Small Cap Value Index are being presented for informational purposes only.

IMC Non-US Micro Cap

The inception date for the IMC Non-US Micro Cap composite is June 1, 2014. Net returns are net of the maximum annual management fee of 0.50%. The Linked Global ex-US Micro Cap Index represents the linked index returns of the Russell Global ex-US Micro Cap Index from June 1, 2014 through December 31, 2018 and the index returns of the FTSE Global ex-US Micro Cap Index effective January 1, 2019 and thereafter. The Russell Global ex-US Micro Cap Index was no longer supported effective December 31, 2018 and the FTSE Global ex-US Micro Cap Index is initiated effective January 1, 2019. The Adviser has linked the returns of these two indexes for comparison purposes because it believes that the linked return stream is the most appropriate broad-based securities indexing available to be used for comparative purposes given the investment strategy of the IMC Non-US Micro Cap Composite. The FTSE Global ex-US Micro Cap Index is a market-capitalization weighted index representing the performance of Micro cap stocks in Developed and Emerging markets (excluding the US). The FTSE Global ex-US Micro Cap index is constructed to represent the Micro-cap segment of the global equity market, excluding companies assigned to the United States.

IMC Non-US Equity Model

The IMC Non-US Equity Model is a portfolio that is paper-traded daily and maintained and calculated using the Factset Research System. The system calculates hypothetical performance based on end of day pricing. Transactions were not executed, and no actual investments were made within the model portfolio. The performance figures do not reflect the results of actual trading or the cost of taxes, brokerage, management fees or other expenses or taxes applicable to a typical investor. Model returns include an allocation to cash and the hypothetical receipt of dividends. Net returns reflect the deduction of the maximum annual management fee of 0.35% before custody charges, withholding taxes and other indirect expenses. Inception-To-Date returns for the IMC Non-US Equity Model portfolio are from the period beginning November 1, 2024.

The MSCI ACWI ex-US Index captures large and mid cap representation across 22 or 23 Developed Markets (DM) countries (excluding the United States) and 24 Emerging Markets (EM) countries. The index is designed to measure equity market performance in the global developed (excluding the US) and emerging markets. The MSCI ACWI ex-US Index has been chosen as a benchmark for the IMC Non-US Equity Model because the Advisor believes that it is the most appropriate broad-based securities index available to be used for comparative purposes given the investment strategy of the portfolio. The MSCI ACWI ex-US Growth Index captures securities exhibiting overall growth style characteristics across 22 DM countries (excluding the US) and 24 EM countries. The MSCI ACWI ex-US Value Index captures securities exhibiting overall value style characteristics across 22 DM countries (excluding the US) and 24 EM countries. The MSCI ACWI ex-US Value Index and the MSCI ACWI ex-US Growth Index are being presented for informational purposes only.

IMC Emerging Markets Small Cap

The inception date for the IMC Emerging Markets Small Cap composite is April 1, 2012. Net returns are net of the maximum annual management fee of 0.50%. The MSCI Emerging Markets Small Cap Index includes small cap representation across 25 Emerging Markets countries (EM) and is designed to measure small cap equity market performance in the global emerging markets. The MSCI Emerging Markets Small Cap Index has been chosen as a benchmark to the IMC Emerging Markets Small Cap strategy because the Advisor believes that it is the most appropriate broad-based securities index available to be used for comparative purposes given the investment strategy of the portfolios. The MSCI Emerging Markets Small Cap Growth Index captures small cap securities exhibiting overall growth style characteristics across 25 EM countries. The MSCI Emerging Markets Value Index captures small cap securities exhibiting value style characteristics across 25 EM countries. The MSCI Emerging Markets Small Cap Growth Index and the MSCI Emerging Markets Small Cap Value Index are being presented for informational purposes only.

IMC Emerging Markets Equity Model

The IMC Emerging Markets (EM) Equity Model is a model portfolio that is paper-traded daily and maintained and calculated using the Factset Research System. The system calculates hypothetical performance based on end of day pricing. Transactions were not executed, and no actual investments were made within the model portfolio. The performance figures do not reflect the results of actual trading or the cost of taxes, brokerage, management fees or other expenses or taxes applicable to a typical investor. Model returns include an allocation to cash and the hypothetical receipt of dividends. Net returns reflect the deduction of the maximum annual management fee of 0.35% before custody charges, withholding taxes and other indirect expenses. Inception-To-Date returns for the IMC EM Equity Model portfolio are from the period beginning February 1, 2023.

The MSCI Emerging Markets (EM) Index captures large and mid cap equity securities across 24 Emerging Market countries and captures approximately 85% of the free float-adjusted market capitalization of each country. The MSCI EM Index has been chosen as a benchmark for the IMC EM Equity Model because the Advisor believes that it is the most appropriate broad-based securities index available to be used for comparative purposes given the investment strategy of the portfolio. The MSCI EM Growth Index captures securities exhibiting overall growth style characteristics across 24 EM countries. The MSCI EM Value Index captures securities exhibiting overall value style characteristics across 24 EM countries. The MSCI EM Value Index and the MSCI EM Growth Index are being presented for informational purposes only.

The performance of the Indexes reflects dividends net of foreign tax withholdings applicable to a typical foreign investor and capital gains but does not reflect the deduction of any investment management fees or other expenses or taxes. The indexes are unmanaged and cannot be invested in directly.

Under no circumstances does the information contained within represent a recommendation to buy or sell securities. The securities identified in the materials are used for illustrative purposes in the discussion of our investment philosophy and processes. We may or may not have held, currently hold, or will hold any of the securities.

The portfolio(s) are actively managed and holdings are subject to change. We believe the information presented is reliable, but we do not guarantee its accuracy. The opinions expressed will evolve as future events unfold. The investment risk of the portfolio(s) may be increased by the portfolios' ability to invest in smaller company stocks, and IPOs. Investing in growth stocks involves certain risks, in part, because the value of securities is based upon future expectations that may or may not be met. Small company stocks are generally riskier than large company stocks due to greater volatility and less liquidity.
