Inception-To-Date returns are from the period beginning October 2, 2007. All returns as of December 31, 2025. Please see important disclosures at the end of this document. Source: IMC, FTSE Russell.

The IMC US Ultra Micro Cap strategy fell 2.05% (net of fees) in the fourth quarter of 2025, underperforming the Russell Microcap Index by 830 basis points and underperforming the Russell Microcap Growth Index by 419 basis points. The strategy was challenged by positioning in micro cap’s risk-on rally, particularly in biotech, as well as by volatility and value headwinds in the quarter and the year.

MARKET ENVIRONMENT

A positive quarter for micro cap, capping a strong second half of 2025

- US equities posted a positive fourth quarter, marking a third consecutive year of double-digit gains. Moderating interest rates, easing recession fears, and improving earnings growth across sectors - encouraged a **rotation into smaller and cyclical firms in Q4**. The Federal Reserve’s shift toward rate cuts proved a key tailwind for small- and micro-cap equities in the second half of 2025.
- Market leadership broadened** late in the year as concerns around AI-related excesses prompted a rotation away from technology in favor of health care, materials, and financials. Consequently, value made a resurgence as a prominent theme across global equity markets in Q4. The Russell Microcap Growth Index gained just 2.1% in Q4 compared to its value counterpart, which was up 9.4%.
- Renewed enthusiasm for biotech** propelled micro cap to come out on top in Q4 – finishing the calendar year ahead of large cap for the first time since 2016. The Russell Microcap Index gained 6.25% in Q4, to end the year as the best performing size segment, up 22.98%.

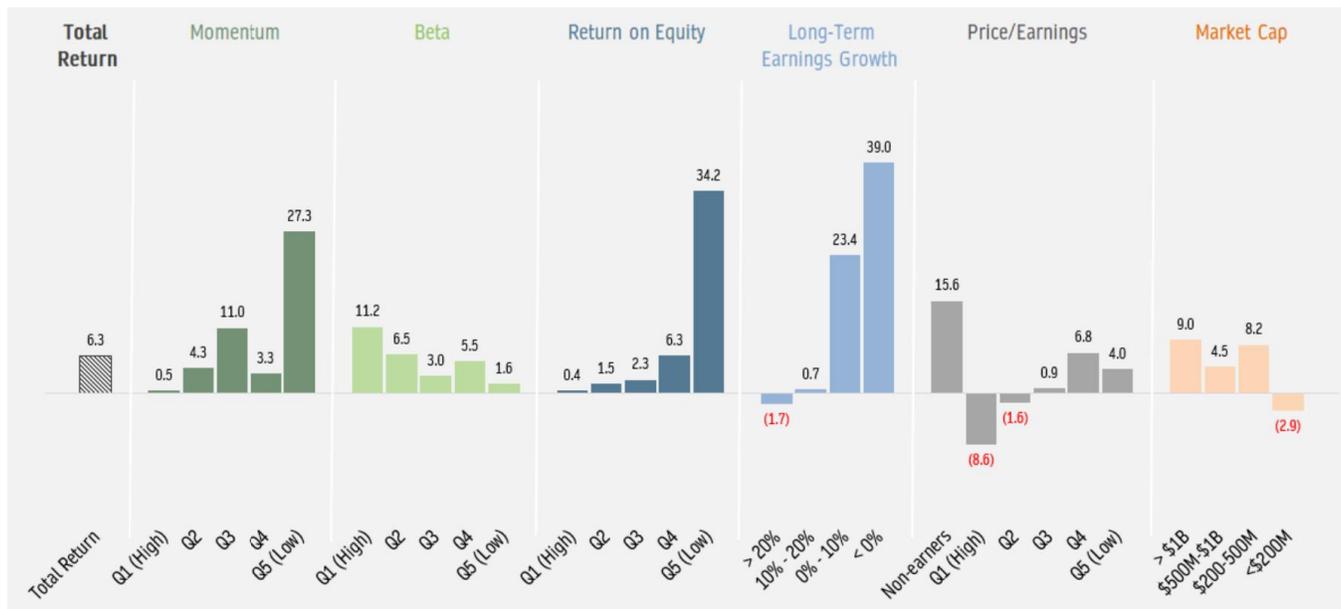

Continued outperformance of low quality in Q4

After the April market bottom, low quality and high beta stocks led a strong comeback, particularly within micro cap. Our analysis of US small cap going back to 1986 showed the second and third quarter of 2025 was the third most dramatic 6-month beta outperformance in history, behind only the dot-com bubble and post-financial crisis periods.

In Q4, this theme continued – the lowest quintiles of stocks for earnings growth and ROE were up over 30%, while stocks with high ROE and high earnings growth were flat-to-negative. Non-earners and higher beta stocks also outperformed. Importantly, the lowest momentum stocks were up 27% in Q4, while the highest quintile was flat. The underperformance of the smallest market caps also hurt the Ultra Micro Cap strategy in Q4.

Russell Microcap Index: Performance Drivers in Q4 2025

Source: Factset, FTSE Russell, Axioma

According to Jefferies, the last 9 months has been one of the biggest outperformances by lower quality, making for a tough environment for active managers – one of the worst years ever for small cap managers.

	Core				Small-Cap Managers				Value			
	% Beat	Avg Ret	Bench	Alpha	% Beat	Avg Ret	Bench	Alpha	% Beat	Avg Ret	Bench	Alpha

Broadening market leadership led by health care

Micro cap’s strong showing in Q4 was powered by strength in health care. The sector was up over 30% in the Russell Microcap Index in the quarter, driven by renewed enthusiasm for biotechnology - supported by a more favorable regulatory backdrop and a resurgence in M&A activity. At the same time, concerns around AI-related excesses prompted a rotation away from technology, which declined 5.2%, while consumer-oriented sectors also sold off amid tighter financial conditions and waning discretionary demand.

From a style perspective, value outperformed growth by 724 basis points as the Russell Microcap Value Index was up 9.4% in Q4. This put value in the lead for the year, 200 basis points ahead of the micro cap growth index.

Russell Microcap Index Sector Returns

Smaller market caps lagged in 2025, particularly in the micro cap growth index

For the calendar year, strength in micro cap was led by larger market cap stocks – most pronounced in the growth index. Stocks <\$500 Million market cap were up just 7.7% in 2025, compared to stocks > \$1 Billion up 35%. This is notable for our Ultra Micro Cap strategy as allocation effects explained the majority of its underperformance in the year.

Q4 2025 ATTRIBUTION

The smaller market cap selection universe was challenged, particularly in health care

The IMC US Ultra Micro Cap strategy fell 2.05% (net of fees) in the fourth quarter of 2025, underperforming the Russell Microcap Index by 830 basis points and underperforming the Russell Microcap Growth Index by 419 basis points. The rally in the micro cap index was driven by strong gains in biotech/pharma where many of the best performers were outside of the ultra micro cap selection universe (PRAX, COGT, TERN).

- Risk attribution shows Informed Momentum (momentum + stock selection) was challenged in the quarter. Exposure to volatility, relative industry positioning (underweight biotech), and underexposure to value further detracted.
- Performance attribution shows we underperformed due to negative stock selection in health care, financials, and consumer discretionary. This was partially offset by positive effects in technology, consumer staples and materials.
- Allocation effects detracted due mostly to being overweight technology and consumer staples.

CALENDAR YEAR 2025 ATTRIBUTION

Larger market caps drove strong benchmark returns in the year

The IMC US Ultra Micro Cap strategy returned 4.46% (net of fees) in 2025, failing to keep pace with the Russell Microcap Index which was up 22.98%. The outperformance of larger market caps within the index was a drag on performance - the lowest market cap quintile was up just 7.6%, while the largest gained 25.5%.

- Risk attribution shows Informed Momentum (momentum + stock selection) was challenged in the period. Exposure to volatility, relative industry positioning (underweight biotech) and underexposure to value further detracted.
- Performance attribution shows we underperformed due to negative stock selection in health care, industrials, and energy. This was partially offset by positive effects in technology, materials and consumer discretionary.
- Allocation effects detracted with an underweight to health care and overweight to consumer discretionary being most significant.

All periods greater than one year are annualized. Please see the "Important Disclosures" page for detailed performance disclosures.

Inception-to-Date returns are for the period from July 1, 2017 for Global Small Cap, for the period from February 1, 2018 for Global Micro Cap, and for the period from January 1, 2024 for Global Equity.

*Effective 2/4/2025, the EAM Global Opportunities strategy and EAM Global Discovery strategy changed their names to IMC Global Small Cap and IMC Global Micro Cap, respectively. This name change aligns with the firm's rebranding from EAM Investors to the Informed Momentum Company (IMC) and more accurately reflects the strategy's investment focus. Please note, the investment approach, objectives, and the team managing the strategy remain unchanged.

*Model strategies are paper-traded daily and maintained and calculated using the Factset Research System. The system calculates hypothetical performance based on end of day pricing. Transactions were not executed, and no actual investments were made within the model portfolio. The performance figures do not reflect the results of actual trading or the cost of taxes, brokerage, management fees or other expenses or taxes applicable to a typical investor. Model returns include an allocation to cash and the hypothetical receipt of dividends.

**Global Micro Cap benchmark is comprised of the Russell Global Micro Cap index from inception thru 12/31/2018, thereafter returns are for the FTSE Global Micro Cap Index.

Important Disclosures

Past performance does not ensure future results, and there is no assurance that the portfolios will achieve their investment objectives.

Gross and net composite returns are presented net of brokerage commissions and include income from interest and dividends as well as capital gains less applicable withholdings. The returns do not reflect the deduction of other taxes a typical investor may accrue or custodial fees. The U.S. Dollar is the currency used to express performance. All periods greater than one year are annualized.

As of February 4th, 2025, EAM Investors, LLC, "EAM" has officially changed its name to the Informed Momentum Company, "IMC". This name change does not impact the integrity or content of the research, reports, or any materials previously published under the old name. All references to "EAM" in past publications and reports now refer to "IMC".

IMC US Small Cap

The inception date for the IMC US Small Cap composite is October 2, 2007. Net returns are net of the maximum annual management fee of 0.50%. The Russell 2000 Index consists of the smallest 2,000 securities in the Russell 3000 Index, representing approximately 10% of the Russell 3000 total market capitalization. The Russell 2000 Value Index (R2KVI) measures the performance of those Russell 2000 companies with relatively lower price-to-book ratios and lower forecasted growth values. The Russell 2000 Index and the Russell 2000 Value Index are being presented for informational purposes only. The Russell 2000 Growth Index (R2KGI) measures the performance of those Russell 2000 companies with higher price-to-book ratios and higher forecasted growth values. The Russell 2000 Growth Index has been chosen as a benchmark to the IMC US Small Cap Growth composite because the Advisor believes that it is the most appropriate broad-based securities index to be used for comparative purposes given the investment growth-oriented strategy of the portfolio.

IMC US Micro Cap

The inception date for the IMC US Micro Cap composite is October 2, 2007. Net returns are net of the maximum annual management fee of 0.50%. The Russell Microcap Index consists of the smallest 1,000 companies in the small-cap Russell 2000 Index plus the next 1,000 securities. The Russell Microcap Growth Index (RMGI) measures the performance of those Russell Microcap companies with higher price-to-book ratios and higher forecasted growth values. The Russell Microcap Value Index measures the performance of those Russell Microcap companies with lower price-to-book ratios and lower forecasted growth values. The Russell Microcap Growth Index and the Russell Microcap Value Index are being presented for informational purposes only. The Russell Microcap Index has been chosen as a benchmark to the IMC Micro Cap composite because the Advisor believes that it is the most appropriate broad-based securities index to be used for comparative purposes given the investment strategy of the portfolio. As of September 1, 2025, the benchmark for the US Micro Cap strategy has been changed from Russell MicroCap Growth Index to Russell MicroCap Index to better align with the strategy's investment objectives and market exposure. Historical performance data from the strategy's inception has been recalculated using Russell MicroCap for comparison purposes. Prior presentations of the strategy's performance, including those in pitchbooks distributed to prospective investors, utilized Russell MicroCap Growth as the benchmark. The change in benchmark may result in different relative performance outcomes.

IMC US Ultra Micro Cap

The inception date for the IMC US Ultra Micro Cap composite is October 2, 2007. Net returns are net of the maximum annual management fee of 0.50%. The Russell Microcap Index consists of the smallest 1,000 companies in the small-cap Russell 2000 Index plus the next 1,000 securities. The Russell Microcap Growth Index (RMGI) measures the performance of those Russell Microcap companies with higher price-to-book ratios and higher forecasted growth values. The Russell Microcap Value Index measures the performance of those Russell Microcap companies with lower price-to-book ratios and lower forecasted growth values. The Russell Microcap Growth Index and the Russell Microcap Value Index are being presented for informational purposes only. The Russell Microcap Index has been chosen as a benchmark to the IMC Ultra Micro Cap composite because the Advisor believes that it is the most appropriate broad-based securities index to be used for comparative purposes given the investment strategy of the portfolio. As of September 1, 2025, the benchmark for the US Ultra Micro Cap strategy has been changed from Russell MicroCap Growth Index to Russell MicroCap Index to better align with the strategy's investment objectives and market exposure. Historical performance data from the strategy's inception has been recalculated using Russell MicroCap for comparison purposes. Prior presentations of the strategy's performance, including those in pitchbooks distributed to prospective investors, utilized Russell MicroCap Growth as the benchmark. The change in benchmark may result in different relative performance outcomes.

IMC US Mid Cap

The inception date for the IMC US Mid Cap representative account is April 1, 2019. Net returns are net of the maximum annual management fee of 0.35%. The Russell Midcap Index is a subset of the Russell 1000 Index and is designed to measure the performance of the mid-cap segment of the US equity universe. It includes approximately 800 of the smallest securities based on a combination of their market cap and current index membership. The Russell Midcap Growth Index measures the performance of those Russell mid-cap companies with higher price-to-book ratios and higher I/B/E/S forecasted medium term (2 year) growth and higher sales per share historical growth (5 year). The Russell Midcap Value Index measures the performance of those Russell Midcap companies with lower price-to-book ratios, lower I/B/E/S forecast medium term (2 year) growth and lower sales per share historical growth (5 years). The Russell Midcap Index has been chosen as a benchmark to the IMC Mid Cap representative account because the Advisor believes that it is the most appropriate broad-based securities index to be used for comparative purposes given the investment strategy of the portfolio. As of July 1, 2025, the benchmark for the US Mid Cap strategy has been changed from Russell Midcap Growth Index to Russell Midcap Index to better align with the strategy's investment objectives and market exposure. Historical performance data from the strategy's inception on April 1, 2019, has been recalculated using Russell Midcap for comparison purposes. Prior presentations of the strategy's performance, including those in pitchbooks distributed to prospective investors, utilized Russell Midcap Growth as the benchmark. The change in benchmark may result in different relative performance outcomes. This strategy is currently funded by seed capital. Its performance may be impacted by a limited capital base, which can result in higher volatility and potential deviations from future performance as additional capital is deployed. The strategy's risk/return profile may evolve over time as it grows and the capital base increases.

IMC US Large Cap

The inception date for the IMC US Large Cap representative account is March 1, 2022. Net returns are net of the maximum annual management fee of 0.20%. The Russell 1000 Index measures the performance of the large cap segment of the US equity universe and is designed to represent approximately 1,000 of the largest securities based on a combination of their market cap and current index membership. The Russell 1000 Index has been chosen as a benchmark to the IMC US Large Cap portfolio because the Advisor believes that it is the most appropriate broad-based securities index to be used for comparative purposes given the investment strategy of the portfolio. The Russell 1000 Growth Index measures the performance of those Russell 1000 companies with higher price-to-book ratios and higher forecasted growth values. The Russell 1000 Value Index measures the performance of those Russell 1000 companies with lower price-to-book ratios and lower forecasted growth values. The Russell 1000 Growth Index and the Russell 1000 Value Index are being presented for informational purposes only. This strategy is currently funded by seed capital. Its performance may be impacted by a limited capital base, which can result in higher volatility and potential deviations from future performance as additional capital is deployed. The strategy's risk/return profile may evolve over time as it grows and the capital base increases.

IMC Non-US Small Cap

The inception date for the IMC Non-US Small Cap composite is May 1, 2011. Net returns are net of the maximum annual management fee of 0.50%. The MSCI ACWI ex-US Small Cap Index captures small cap representation across 22 of 23 Developed Markets (DM) countries (excluding the US) and 25 Emerging Markets (EM) countries. The index is designed to measure small cap equity market performance in the global developed and emerging markets excluding the United States. The MSCI ACWI ex-US Small Cap Index has been chosen as a benchmark to the IMC Non-US Small Cap strategy because the Advisor believes that it is the most appropriate broad-based securities index available to be used for comparative purposes given the investment strategy of the portfolios. The MSCI ACWI ex-US Small Cap Growth Index captures small cap securities exhibiting overall growth style characteristics across 22 of 23 DM countries (excluding the US) and 25 EM countries. The MSCI ACWI Small Cap Value Index captures small cap securities exhibiting overall value style characteristics across 23 DM countries and 25 EM countries. The MSCI ACWI ex-US Small Cap Growth Index and the MSCI ACWI ex-US Small Cap Value Index are being presented for informational purposes only.

IMC Non-US Micro Cap

The inception date for the IMC Non-US Micro Cap composite is June 1, 2014. Net returns are net of the maximum annual management fee of 0.50%. The Linked Global ex-US Micro Cap Index represents the linked index returns of the Russell Global ex-US Micro Cap Index from June 1, 2014 through December 31, 2018 and the index returns of the FTSE Global ex-US Micro Cap Index effective January 1, 2019 and thereafter. The Russell Global ex-US Micro Cap Index was no longer supported effective December 31, 2018 and the FTSE Global ex-US Micro Cap Index is initiated effective January 1, 2019. The Adviser has linked the returns of these two indexes for comparison purposes because it believes that the linked return stream is the most appropriate broad-based securities indexing available to be used for comparative purposes given the investment strategy of the IMC Non-US Micro Cap Composite. The FTSE Global ex-US Micro Cap Index is a market-capitalization weighted index representing the performance of Micro cap stocks in Developed and Emerging markets (excluding the US). The FTSE Global ex-US Micro Cap index is constructed to represent the Micro-cap segment of the global equity market, excluding companies assigned to the United States.

IMC Non-US Equity Model

The IMC Non-US Equity Model is a portfolio that is paper-traded daily and maintained and calculated using the Factset Research System. The system calculates hypothetical performance based on end of day pricing. Transactions were not executed, and no actual investments were made within the model portfolio. The performance figures do not reflect the results of actual trading or the cost of taxes, brokerage, management fees or other expenses or taxes applicable to a typical investor. Model returns include an allocation to cash and the hypothetical receipt of dividends. Net returns reflect the deduction of the maximum annual management fee of 0.35% before custody charges, withholding taxes and other indirect expenses. Inception-To-Date returns for the IMC Non-US Equity Model portfolio are from the period beginning November 1, 2024.

The MSCI ACWI ex-US Index captures large and mid cap representation across 22 or 23 Developed Markets (DM) countries (excluding the United States) and 24 Emerging Markets (EM) countries. The index is designed to measure equity market performance in the global developed (excluding the US) and emerging markets. The MSCI ACWI ex-US Index has been chosen as a benchmark for the IMC Non-US Equity Model because the Advisor believes that it is the most appropriate broad-based securities index available to be used for comparative purposes given the investment strategy of the portfolio. The MSCI ACWI ex-US Growth Index captures securities exhibiting overall growth style characteristics across 22 DM countries (excluding the US) and 24 EM countries. The MSCI ACWI ex-US Value Index captures securities exhibiting overall value style characteristics across 22 DM countries (excluding the US) and 24 EM countries. The MSCI ACWI ex-US Value Index and the MSCI ACWI ex-US Growth Index are being presented for informational purposes only.

IMC Emerging Markets Small Cap

The inception date for the IMC Emerging Markets Small Cap composite is April 1, 2012. Net returns are net of the maximum annual management fee of 0.50%. The MSCI Emerging Markets Small Cap Index includes small cap representation across 25 Emerging Markets countries (EM) and is designed to measure small cap equity market performance in the global emerging markets. The MSCI Emerging Markets Small Cap Index has been chosen as a benchmark to the IMC Emerging Markets Small Cap strategy because the Advisor believes that it is the most appropriate broad-based securities index available to be used for comparative purposes given the investment strategy of the portfolios. The MSCI Emerging Markets Small Cap Growth Index captures small cap securities exhibiting overall growth style characteristics across 25 EM countries. The MSCI Emerging Markets Value Index captures small cap securities exhibiting value style characteristics across 25 EM countries. The MSCI Emerging Markets Small Cap Growth Index and the MSCI Emerging Markets Small Cap Value Index are being presented for informational purposes only.

IMC Emerging Markets Equity Model

The IMC Emerging Markets (EM) Equity Model is a model portfolio that is paper-traded daily and maintained and calculated using the Factset Research System. The system calculates hypothetical performance based on end of day pricing. Transactions were not executed, and no actual investments were made within the model portfolio. The performance figures do not reflect the results of actual trading or the cost of taxes, brokerage, management fees or other expenses or taxes applicable to a typical investor. Model returns include an allocation to cash and the hypothetical receipt of dividends. Net returns reflect the deduction of the maximum annual management fee of 0.35% before custody charges, withholding taxes and other indirect expenses. Inception-To-Date returns for the IMC EM Equity Model portfolio are from the period beginning February 1, 2023.

The MSCI Emerging Markets (EM) Index captures large and mid cap equity securities across 24 Emerging Market countries and captures approximately 85% of the free float-adjusted market capitalization of each country. The MSCI EM Index has been chosen as a benchmark for the IMC EM Equity Model because the Advisor believes that it is the most appropriate broad-based securities index available to be used for comparative purposes given the investment strategy of the portfolio. The MSCI EM Growth Index captures securities exhibiting overall growth style characteristics across 24 EM countries. The MSCI EM Value Index captures securities exhibiting overall value style characteristics across 24 EM countries. The MSCI EM Value Index and the MSCI EM Growth Index are being presented for informational purposes only.

IMC Global Small Cap

Effective 2/4/2025, the EAM Global Opportunities strategy changed its name to IMC Global Small Cap. This name change aligns with the firm's rebranding from EAM Investors to the Informed Momentum Company (IMC) and more accurately reflects the strategy's investment focus. Please note, the investment approach, objectives, and the team managing the strategy remain unchanged.

The MSCI ACWI Value Index captures securities exhibiting overall value style characteristics across 23 DM countries and 24 EM countries. The MSCI ACWI Value Index and the MSCI ACWI Growth Index are being presented for informational purposes only.

The performance of the Indexes reflects dividends net of foreign tax withholdings applicable to a typical foreign investor and capital gains but does not reflect the deduction of any investment management fees or other expenses or taxes. The indexes are unmanaged and cannot be invested in directly.

Under no circumstances does the information contained within represent a recommendation to buy or sell securities. The securities identified in the materials are used for illustrative purposes in the discussion of our investment philosophy and processes. We may or may not have held, currently hold, or will hold any of the securities.

The portfolio(s) are actively managed and holdings are subject to change. We believe the information presented is reliable, but we do not guarantee its accuracy. The opinions expressed will evolve as future events unfold. The investment risk of the portfolio(s) may be increased by the portfolios' ability to invest in smaller company stocks, and IPOs. Investing in growth stocks involves certain risks, in part, because the value of securities is based upon future expectations that may or may not be met. Small company stocks are generally riskier than large company stocks due to greater volatility and less liquidity.
