Inception-To-Date returns are from the period beginning October 2, 2007. All returns as of June 30, 2026.
Please see important disclosures at the end of this document. Source: IMC, FTSE Russell.

The IMC US Micro Cap strategy gained 28.11% (net of fees) in the second quarter of 2026, outperforming the Russell Microcap Index by 248 basis points and underperforming the Russell Microcap Growth Index by 87 basis points. Informed Momentum (momentum + stock selection) contributed most to outperformance in the quarter. Overweight positioning to technology and financials was additive, while stock selection in health care detracted.

MARKET ENVIRONMENT

AI-driven leadership supported a strong second quarter

- It was a strong second quarter for US equities driven by persistent strength in the AI investment cycle and resilient corporate earnings. Technology led the market, though strength extended well beyond the largest companies as investor risk appetite improved. The market also became increasingly differentiated rewarding companies demonstrating tangible AI-driven earnings rather than AI exposure alone.
- Inflation and Fed policy expectations remained sources of volatility throughout the quarter. While economic data continued to influence sentiment, a more stable outlook for monetary policy supported equity valuations, particularly in growth-oriented sectors.
- Smaller market caps extended their lead in the quarter. The Russell 2000 Index gained 21.5% in Q2 versus 15.1% for the Russell 1000, while the Russell Microcap Index led all market cap segments with a 25.6% return. Through the first half of 2026, the Russell 2000 gained 22.6%, compared to 10.3% for the Russell 1000, with the Russell Microcap Index leading at 27.5%.

Beta and Momentum outperformed

According to Axioma, market sensitivity (beta), momentum and profitability were the best performing factors in US equity markets in Q2, while size (large cap) underperformed. Within the Russell Microcap Index, stocks with the highest long-term earnings growth were the best performers in the quarter, up more than 70%. The outperformance of high beta, high momentum and larger market cap stocks within the micro cap index were also prominent themes in the quarter.

Russell Microcap Index: Performance Drivers in Q2 2026

Source: Factset, FTSE Russell, Axioma

Growth regained leadership as AI enthusiasm accelerated

AI remained the dominant theme throughout the quarter. Continued investment in AI infrastructure supported semiconductor, networking, and electrical equipment companies, while improving investor sentiment expanded participation into other growth-oriented industries. The Russell Microcap Growth Index gained 29.0% in Q2, outperforming Value's 23.2% return by more than 578 basis points.

Technology and communication services were the standouts in the core index, surging 68.6% and 48.8%, respectively. Industrials (+25.4%) and Health Care (+22.7%) also posted strong gains, reflecting broad participation beyond technology. Energy was the laggard in the quarter as the announcement of a US-Iran ceasefire caused oil prices to fall, while materials (-2.9%) and utilities (-0.6%) also posted declines.

Q2 2026 ATTRIBUTION

Informed Momentum contributed most in Q2

The IMC US Micro Cap strategy gained 28.11% (net of fees) in the second quarter of 2026, outperforming the Russell Microcap Index by 248 basis points and underperforming the Russell Microcap Growth Index by 87 basis points.

- Risk attribution shows Informed Momentum (momentum + stock selection) contributed most to outperformance in the quarter, while exposure to market sensitivity (beta) and profitability was further additive. On the downside, exposure to size and liquidity as well as underexposure to value detracted.
- Performance attribution shows sector allocation effects were positive in Q2. Being overweight technology and underweight financials contributed most to outperformance, offset partially by negative effects being overweight energy and underweight health care.
- Stock selection detracted in the quarter due to negative effects in health care and technology, while stock selection in energy, materials and communication services was additive.

Important Disclosures

Past performance does not ensure future results, and there is no assurance that the portfolios will achieve their investment objectives.

Gross and net composite returns are presented net of brokerage commissions and include income from interest and dividends as well as capital gains less applicable withholdings. The returns do not reflect the deduction of other taxes a typical investor may accrue or custodial fees. The U.S Dollar is the currency used to express performance. All periods greater than one year are annualized.

IMC US Small Cap

The inception date for the IMC US Small Cap composite is October 2, 2007. Net returns are net of the maximum annual management fee of 0.50%. The Russell 2000 Index consists of the smallest 2,000 securities in the Russell 3000 Index, representing approximately 10% of the Russell 3000 total market capitalization. The Russell 2000 Value Index (R2KVI) measures the performance of those Russell 2000 companies with relatively lower price-to-book ratios and lower forecasted growth values. The Russell 2000 Index and the Russell 2000 Value Index are being presented for informational purposes only. The Russell 2000 Growth Index (R2KGI) measures the performance of those Russell 2000 companies with higher price-to-book ratios and higher forecasted growth values. The Russell 2000 Growth Index has been chosen as a benchmark to the IMC US Small Cap Growth composite because the Advisor believes that it is the most appropriate broad-based securities index to be used for comparative purposes given the investment growth-oriented strategy of the portfolio.

IMC US Micro Cap

The inception date for the IMC US Micro Cap composite is October 2, 2007. Net returns are net of the maximum annual management fee of 0.50%. The Russell Microcap Index consists of the smallest 1,000 companies in the small-cap Russell 2000 Index plus the next 1,000 securities. The Russell Microcap Growth Index (RMGI) measures the performance of those Russell Microcap companies with higher price-to-book ratios and higher forecasted growth values. The Russell Microcap Value Index measures the performance of those Russell Microcap companies with lower price-to-book ratios and lower forecasted growth values. The Russell Microcap Growth Index and the Russell Microcap Value Index are being presented for informational purposes only. The Russell Microcap Index has been chosen as a benchmark to the IMC Micro Cap composite because the Advisor believes that it is the most appropriate broad-based securities index to be used for comparative purposes given the investment strategy of the portfolio. As of September 1, 2025, the benchmark for the US Micro Cap strategy has been changed from Russell MicroCap Growth Index to Russell MicroCap Index to better align with the strategy's investment objectives and market exposure. Historical performance data from the strategy's inception has been recalculated using Russell MicroCap for comparison purposes. Prior presentations of the strategy's performance, including those in pitchbooks distributed to prospective investors, utilized Russell MicroCap Growth as the benchmark. The change in benchmark may result in different relative performance outcomes.

IMC US Ultra Micro Cap

The inception date for the IMC US Ultra Micro Cap composite is October 2, 2007. Net returns are net of the maximum annual management fee of 0.50%. The Russell Microcap Index consists of the smallest 1,000 companies in the small-cap Russell 2000 Index plus the next 1,000 securities. The Russell Microcap Growth Index (RMGI) measures the performance of those Russell Microcap companies with higher price-to-book ratios and higher forecasted growth values. The Russell Microcap Value Index measures the performance of those Russell Microcap companies with lower price-to-book ratios and lower forecasted growth values. The Russell Microcap Growth Index and the Russell Microcap Value Index are being presented for informational purposes only. The Russell Microcap Index has been chosen as a benchmark to the IMC Ultra Micro Cap composite because the Advisor believes that it is the most appropriate broad-based securities index to be used for comparative purposes given the investment strategy of the portfolio. As of September 1, 2025, the benchmark for the US Ultra Micro Cap strategy has been changed from Russell MicroCap Growth Index to Russell MicroCap Index to better align with the strategy's investment objectives and market exposure. Historical performance data from the strategy's inception has been recalculated using Russell MicroCap for comparison purposes. Prior presentations of the strategy's performance, including those in pitchbooks distributed to prospective investors, utilized Russell MicroCap Growth as the benchmark. The change in benchmark may result in different relative performance outcomes.

IMC US Mid Cap

The inception date for the IMC US Mid Cap representative account is April 1, 2019. Net returns are net of the maximum annual management fee of 0.35%. The Russell Midcap Index is a subset of the Russell 1000 Index and is designed to measure the performance of the mid-cap segment of the US equity universe. It includes approximately 800 of the smallest securities based on a combination of their market cap and current index membership. The Russell Midcap Growth Index measures the performance of those Russell mid-cap companies with higher price-to-book ratios and higher I/B/E/S forecasted medium term (2 year) growth and higher sales per share historical growth (5 year). The Russell Midcap Value Index measures the performance of those Russell Midcap companies with lower price-to-book ratios, lower I/B/E/S forecast medium term (2 year) growth and lower sales per share historical growth (5 years). The Russell Midcap Index has been chosen as a benchmark to the IMC Mid Cap representative account because the Advisor believes that it is the most appropriate broad-based securities index to be used for comparative purposes given the investment strategy of the portfolio. As of July 1, 2025, the benchmark for the US Mid Cap strategy has been changed from Russell Midcap Growth Index to Russell Midcap Index to better align with the strategy's investment objectives and market exposure. Historical performance data from the strategy's inception on April 1, 2019, has been recalculated using Russell Midcap for comparison purposes. Prior presentations of the strategy's performance, including those in pitchbooks distributed to prospective investors, utilized Russell Midcap Growth as the benchmark. The change in benchmark may result in different relative performance outcomes. This strategy is currently funded by seed capital. Its performance may be impacted by a limited capital base, which can result in higher volatility and potential deviations from future performance as additional capital is deployed. The strategy's risk/return profile may evolve over time as it grows and the capital base increases.

IMC US Large Cap

The inception date for the IMC US Large Cap representative account is March 1, 2022. Net returns are net of the maximum annual management fee of 0.20%. The Russell 1000 Index measures the performance of the large cap segment of the US equity universe and is designed to represent approximately 1,000 of the largest securities based on a combination of their market cap and current index membership. The Russell 1000 Index has been chosen as a benchmark to the IMC US Large Cap portfolio because the Advisor believes that it is the most appropriate broad-based securities index to be used for comparative purposes given the investment strategy of the portfolio. The Russell 1000 Growth Index measures the performance of those Russell 1000 companies with higher price-to-book ratios and higher forecasted growth values. The Russell 1000 Value Index measures the performance of those Russell 1000 companies with lower price-to-book ratios and lower forecasted growth values. The Russell 1000 Growth Index and the Russell 1000 Value Index are being presented for informational purposes only. This strategy is currently funded by seed capital. Its performance may be impacted by a limited capital base, which can result in higher volatility and potential deviations from future performance as additional capital is deployed. The strategy's risk/return profile may evolve over time as it grows and the capital base increases.

IMC Non-US Small Cap

The inception date for the IMC Non-US Small Cap composite is May 1, 2011. Net returns are net of the maximum annual management fee of 0.50%. The MSCI ACWI ex-US Small Cap Index captures small cap representation across 22 of 23 Developed Markets (DM) countries (excluding the US) and 25 Emerging Markets (EM) countries. The index is designed to measure small cap equity market performance in the global developed and emerging markets excluding the United States. The MSCI ACWI ex-US Small Cap Index has been chosen as a benchmark to the IMC Non-US Small Cap strategy because the Advisor believes that it is the most appropriate broad-based securities index available to be used for comparative purposes given the investment strategy of the portfolios. The MSCI ACWI ex-US Small Cap Growth Index captures small cap securities exhibiting overall growth style characteristics across 22 of 23 DM countries (excluding the US) and 25 EM countries. The MSCI ACWI Small Cap Value Index captures small cap securities exhibiting overall value style characteristics across 23 DM countries and 25 EM countries. The MSCI ACWI ex-US Small Cap Growth Index and the MSCI ACWI ex-US Small Cap Value Index are being presented for informational purposes only.

IMC Non-US Micro Cap

The inception date for the IMC Non-US Micro Cap composite is June 1, 2014. Net returns are net of the maximum annual management fee of 0.50%. The Linked Global ex-US Micro Cap Index represents the linked index returns of the Russell Global ex-US Micro Cap Index from June 1, 2014 through December 31, 2018 and the index returns of the FTSE Global ex-US Micro Cap Index effective January 1, 2019 and thereafter. The Russell Global ex-US Micro Cap Index was no longer supported effective December 31, 2018 and the FTSE Global ex-US Micro Cap Index is initiated effective January 1, 2019. The Adviser has linked the returns of these two indexes for comparison purposes because it believes that the linked return stream is the most appropriate broad-based securities indexing available to be used for comparative purposes given the investment strategy of the IMC Non-US Micro Cap Composite. The FTSE Global ex-US Micro Cap Index is a market-capitalization weighted index representing the performance of Micro cap stocks in Developed and Emerging markets (excluding the US). The FTSE Global ex-US Micro Cap index is constructed to represent the Micro-cap segment of the global equity market, excluding companies assigned to the United States.

IMC Non-US Equity Model

The IMC Non-US Equity Model is a portfolio that is paper-traded daily and maintained and calculated using the Factset Research System. The system calculates hypothetical performance based on end of day pricing. Transactions were not executed, and no actual investments were made within the model portfolio. The performance figures do not reflect the results of actual trading or the cost of taxes, brokerage, management fees or other expenses or taxes applicable to a typical investor. Model returns include an allocation to cash and the hypothetical receipt of dividends. Net returns reflect the deduction of the maximum annual management fee of 0.35% before custody charges, withholding taxes and other indirect expenses. Inception-To-Date returns for the IMC Non-US Equity Model portfolio are from the period beginning November 1, 2023.

The MSCI ACWI ex-US Index captures large and mid cap representation across 22 or 23 Developed Markets (DM) countries (excluding the United States) and 24 Emerging Markets (EM) countries. The index is designed to measure equity market performance in the global developed (excluding the US) and emerging markets. The MSCI ACWI ex-US Index has been chosen as a benchmark for the IMC Non-US Equity Model because the Advisor believes that it is the most appropriate broad-based securities index available to be used for comparative purposes given the investment strategy of the portfolio. The MSCI ACWI ex-US Growth Index captures securities exhibiting overall growth style characteristics across 22 DM countries (excluding the US) and 24 EM countries. The MSCI ACWI ex-US Value Index captures securities exhibiting overall value style characteristics across 22 DM countries (excluding the US) and 24 EM countries. The MSCI ACWI ex-US Value Index and the MSCI ACWI ex-US Growth Index are being presented for informational purposes only.

IMC Emerging Markets Small Cap

The inception date for the IMC Emerging Markets Small Cap composite is April 1, 2012. Net returns are net of the maximum annual management fee of 0.50%. The MSCI Emerging Markets Small Cap Index includes small cap representation across 25 Emerging Markets countries (EM) and is designed to measure small cap equity market performance in the global emerging markets. The MSCI Emerging Markets Small Cap Index has been chosen as a benchmark to the IMC Emerging Markets Small Cap strategy because the Advisor believes that it is the most appropriate broad-based securities index available to be used for comparative purposes given the investment strategy of the portfolios. The MSCI ACWI Value Index captures securities exhibiting overall value style characteristics across 23 DM countries and 24 EM countries. The MSCI ACWI Value Index and the MSCI ACWI Growth Index are being presented for informational purposes only.

The performance of the Indexes reflects dividends net of foreign tax withholdings applicable to a typical foreign investor and capital gains but does not reflect the deduction of any investment management fees or other expenses or taxes. The indexes are unmanaged and cannot be invested in directly.

Under no circumstances does the information contained within represent a recommendation to buy or sell securities. The securities identified in the materials are used for illustrative purposes in the discussion of our investment philosophy and processes. We may or may not have held, currently hold, or will hold any of the securities.

The portfolio(s) are actively managed and holdings are subject to change. We believe the information presented is reliable, but we do not guarantee its accuracy. The opinions expressed will evolve as future events unfold. The investment risk of the portfolio(s) may be increased by the portfolios' ability to invest in smaller company stocks, and IPOs. Investing in growth stocks involves certain risks, in part, because the value of securities is based upon future expectations that may or may not be met. Small company stocks are generally riskier than large company stocks due to greater volatility and less liquidity.
